

Linking ShowGo to the Data

These instructions will show you how to connect your ShowGo software to the ShowGo data stored on the network.

Instructions:

- A. **CTRL + Click** on this link: <C:\Program Files\Seattle Software\ShowGo\ShowGo.exe.config>
 - a. This will open this file: **ShowGo.exe.config**
 - b. In a PDF, change your mouse to the **Select Tool**, then click on the link above
- B. Press **OK**
- C. Press **Ctrl + F** (Find)
- D. Type **Data Source**, Press **OK**
 - a. The info to the right of the equal sign '=' is where ShowGo is looking for the data. (i.e.: Data Source=**localhost**)
- E. Replace 'localhost' with the **IP address** or **machine name** provided by your IT department.
- F. Click **File > Save**
- G. **Close**
